BAI LED Glow Landscape G200 E27 4W (20W) 200lm 1800K Clear/Gold 360D 200x200mm LED-Lamp

While a lot is already possible with LED filament lamps, it was still difficult to imitate the super thin filaments of the original light bulb. Bailey's Led Glow comes very close, however. The luminous and durable LED element is located in the lamp base. The "filaments" are engraved in an acrylic tube and reflect the warm light bulb color. The special Landscape version of the Glow is special for several reasons. First of all, the glass of this 3-4 globe (G200) sphere is clear but the feeling when you sit under the lamp is just as "warm" as with a lamp with gold glass. From the side you can see a landscape, but when you sit under it you have the idea that you are looking at the inside of a cut orange. But experience it for yourself as everyone sees something different in it. It sure is special.
