

EcoDim ED-10009 LED Dim Stabilizer

Aksesuaras buitiniam šviesos reguliatoriui

11982

ECODIM ED-10009 LED DIM Stabilizer

With the dimming stabilizer you prevent flashing, flickering and fluctuating light. The dimming stabilizer also ensures that lamps do not glow in the event of leakage current. You connect the LED dimming stabilizer in parallel to the LED lamp between the switching wire and neutral wire. The dimming stabilizer works perfectly in combination with the EcoDim dimmers.
