ECODIM ED-10048 Surface-Mounted Furniture Spotlight Nickel

This nickel-colored surface-mounted fixture is made to use the EcoDim furniture spotlights in a surface-mounted situation. This can be a choice regarding a specific interior, but is also often used for concrete ceilings, for example. Installing LED spotlights is more difficult there. This surface-mounted fixture is very sturdy and has a beautifully finished coating. The surface-mounted fixture for LED spotlights is unique because it is completely screwless. The screws are installed in the surface-mounted fixture and are therefore not visible from the outside. This gives the fixture a very sleek design. The surface-mounted set has a maximum installation depth of 18mm. This means that in most cases it is only suitable for the matching EcoDim furniture spotlights.
