

EcoDim ED-10065 Surface-Mounted Spot Fixture Round Black

Mechaninis aksesuaras šviestuvui

12511

*ECO DIM ED-10065 Surface-Mounted Spot Fixture Rond Black
Spotlight holder diameter 80-85mm Recessed depth 120mm*

This black surface-mounted fixture is made to use normal spot holders in a surface-mounted situation. This can be a choice regarding a specific interior, but is also often used for concrete ceilings, for example. Installing LED spotlights is more difficult there. This surface-mounted fixture is very sturdy and has a beautifully finished coating. The surface-mounted fixture for LED spotlights is unique because it is completely screwless. This gives the fixture a very sleek design. The surface-mounted set has a maximum installation depth of 120mm. This means that most spotlight holders including, for example, an MR16 or GU10 spotlight including fitting can be placed in this surface-mounted set. These surface-mounted sets are specially made for our round, shallow recessed spotlights.
