ECODIM ED-10013 Wireless switch Zigbee 2 Groups Black

This black EcoDim wireless smart switch can be placed anywhere you want with double-sided tape. So you don't need any wiring for this. This wireless switch/wall transmitter can control two groups with an on/off function. There is also a dimming function available, but the smart device to which this switch is linked must support a dimming function. The smart switch is powered by a battery and makes contact via a Zigbee signal. This wireless Zigbee switch is available in white and, in addition to its own mounting frame, can also be used in a GIRA 55 system. The wireless switch can be loaded into the well-known Zigbee home automation systems such as Homey (from version 5.0), Philips Hue and Trust.
