

## Connection Cable for Party Balls Light String

12856

*BAI Connection Cable 530mm for Party Balls Light String 146781*

*Optional connector to connect multiple Led Party Balls Strings (#146781) together waterproof. The Led party Balls String can normally be connected with a traditional head-tail connector (IP54) according to the manual and without additional accessories. However, with this extra connector you can seamlessly extend the Light String and with the same distance and line as between the other balls. By removing the end piece of one Light String and the beginning of the other Light String and replacing it with this connection cable you get a longer Light String that remains IP67.*
