

Microwave Motion Sensor for LED Rope Plus

12928

BAI Microwave Motion Sensor 5.8Ghz IP65 Cable 425mm for Robust LED rope plus series

Smart motion sensor for Robust LED Rope Plus. This compact sensor is designed for use with Robust LED Ropes Plus. Using high-frequency motion detection (5.8 GHz), it automatically switches the lights on at the slightest movement even through doors, glass windows, or thin walls. Easily adjust detection range, and switch-on time by removing the cover plate. Thanks to the clever connection system, the sensor is compatible with various versions of the LED Rope Plus series. An efficient, user-friendly solution for smart automatic lighting!
