*Excelitas Endoscopy 14V 300W 5600K Xenon 32.96x42.34mm
Lamp for medical applications*

An endoscopy is an examination of the interior of a human to see what is going on, to take a biopsy or to perform an operation. This is done with an instrument called the endoscope that allows a doctor to see inside the body through a rigid tube or flexible hose.

KLASIFIKACIJA

Grupė	Lempos
Klasė	Medicininės paskirties lempos
Pavadinimas	Excelitas Endoscopy 14V 300W
Gamintojas	BAI
Serija	Medical
Tipas	Endoscopy
EAN	8714681131756
Gamintojo kodas	PE300BF

PARAMETRAI

Lizdas	Kita
Lempos galia [W]	300
Lempos įtampa [V]	14 - 14
Nominali srovė [mA]	21000
Pritaikymas	Endoskopams
