*The OSRAM LIGHTsignal LED BEACON LIGHT is a 360° rotating, amber LED rotating beacon that can be mounted on vehicles with unusual width, length or load, as well as on municipal vehicles, emergency vehicles, command vehicles and accident assistance vehicles to draw attention to an unusual situation in road traffic or in the working environment. The rotating beacon from OSRAM can be used for better visual recognition, marking and securing of danger spots or special locations. Furthermore, rotating beacons are used in certain facilities, on machines and devices as well as in alarm systems. The LED rotating beacon from OSRAM is characterized by a high efficiency due to eight long-life highpower LEDs with up to 1900 Kelvin and 1200 Lumen, thus ensuring improved visibility and thus increased safety for you and others - during the day and at night. Thanks to the nonslip, shock-absorbing rubber base, the LED warning light from OSRAM has a particularly high vibration insensitivity.*
