*VIC IR Ceramic RSFL Reflector E27 230V 250W Reptiles
100x140mm Ceramic infrared heater lamp no visible light*

Reptiles and amphibians are ectothermic, or cold blooded, which means that their internal physiological sources of heat, which control body temperature are very small. they therefore rely on external heat to warm their bodies. The use of a proper heating system is therefore a very important part of a vivarium setup. This ceramic infrared heater lamp provides a simple and effective way to give animals they heat they need. No light so this lamp does not interrupt sleep pattern. Water resistant suitable for humid environments.
